subject: EFARO's input to the Public consultation on Horizon 2020 'Food Security, sustainable agriculture and forestry, marine and maritime and inland water research and the bioeconomy' Work Programme 2018-2020
attachment: Research Priorities 2018-2020

Dear Sir / Madam,

I am writing this letter to you on behalf of EFARO (www.efaro.eu: the Association of Directors of the main European Research Institutes involved in Fisheries, Aquaculture and its interaction with the Marine Environment), in relation to the "Public consultation on Horizon 2020 'Food Security, sustainable agriculture and forestry, marine and maritime and inland water research and the bioeconomy' Work Programme 2018-2020". This is - obviously - a matter of interest to us given the EFARO remit and role. Given the importance with which we perceive this subject we have taken the liberty to respond by means of this letter with focussed input. We prefer not to respond to the extensive internet questionnaire.

I hope this input will be of use to the consultation procedure and will help sharpen the discussions on how to proceed. EFARO is very much willing to further discuss this matter with you.

Sincerely yours and best wishes,

Dr. Tammo Bult
EFARO President
